The program assumes an ideal starting point of Grade 1, though other entry points are possible. Because schools cannot fit into a year all the annual lessons we were making for early elementary, 30 of the approximately 90 language lessons will be designed specifically for upper elementary in 09-10. Those students should go through at least half the early elementary lessons before doing the 30, since lots of content in the early-elementary lessons is unique. Junior high lessons begin in 09-10 for certain schools, under a separate fee arrangement.

Many kindergarteners can work the Fluency Builder software just fine with a little guidance. *The video components add quite a bit of instruction not found in the Fluency Builder, and vice versa.* Please do not use the Cultural Insights sessions with students below 4th grade.

Vocabulary and grammar. We incorporate the usual content, guided by the new standards. We concentrate on core content, going at it over and over in varied combinations, contexts and speeds.

It's nonsense to think that more than a tiny percentage of elementary and middle schools will find time in their packed schedules to meet all the world language standards. It isn't going to happen. But a significant dent can be made, and most of the standards are quite good.
